

CHIEF EXPRESS SELECTS ORBCOMM'S IN-CAB AND TRAILER MONITORING SOLUTIONS FOR FLEET MANAGEMENT

Leverages ORBCOMM's integrated platform for their trucks and trailers to enhance driver safety and improve fleet-wide compliance and efficiency

Rochelle Park, NJ, October 25, 2018 – ORBCOMM Inc. (Nasdaq: ORBC), a global provider of Machine-to-Machine (M2M) and Internet of Things (IoT) solutions, today announced that it has been selected by Chief Express LLC, a truckload carrier based in Seagrove, NC, to provide its in-cab solution for their trucks and its trailer monitoring solution for their dry van fleet. ORBCOMM's end-to-end solutions provide wireless connectivity through its industry-leading hardware and integrated Cloud-based analytics platform and information management engine for optimal fleet management.

Chief Express is using ORBCOMM's driver-friendly in-cab solution to gain complete visibility, monitoring and management of their drivers and trucks. ORBCOMM's in-cab solution delivers [GPS fleet tracking](#) and connects to the truck's CANbus to seamlessly collect important data from the engine, brake systems, fuel tanks and more, providing access to deep analytics and reporting via [FleetManager](#), ORBCOMM's newest web platform. By automating hours of service calculations, ORBCOMM enables Chief Express to comply with the [Electronic Logging Device \(ELD\) and FMCSA Hours of Service \(HOS\)](#). ORBCOMM's in-cab solution also helps Chief Express improve [driver safety](#) by providing live, on-board [driver performance scoring](#) and correcting unsafe driving behaviors that lead to accidents, fines and higher insurance. ORBCOMM's platform enables Chief Express to decrease operating and maintenance costs and improve productivity through real-time asset management, reduced risk of fuel loss and preventive maintenance as well.

To manage its dry van fleet, Chief Express is using ORBCOMM's ruggedized [trailer monitoring solution](#) along with FleetManager to access live and scheduled status updates whether their trailers are in transit or in the yard. ORBCOMM's solution also provides Chief Express with the unique ability to see precise data on distance travelled by each trailer so they can accurately schedule trailer servicing and inspections based on odometer readings or time elapsed for maximum asset utilization.

In addition, Chief Express is using an integration that links ORBCOMM's FleetManager data from its truck and trailer assets to its [McLeod Software](#) dispatch and enterprise management solution for a centralized view, further enhancing workflow productivity, communications and customer service.

“We are pleased to have won both the in-cab and trailer business for a leading truckload carrier like Chief Express, which reaffirms our unique competitive advantage and leadership in this market to provide telematics solutions for nearly every transport asset class through one integrated platform,” said Marc Eisenberg, Chief Executive Officer of ORBCOMM Inc. “We look forward

to helping Chief Express create a safe, efficient and productive fleet through our industry-leading truck and trailer management solutions.”

“ORBCOMM’s advanced telematics solutions for trucks and trailers are better than anything we have seen on the market, and their fleet management portal and driver-friendly in-cab product are lightyears ahead of the competition in terms of features, functionality and usability,” said Kennan Hill, President and Owner of Chief Express LLC. “We are pleased with the level of service we are receiving from ORBCOMM and are already seeing bottom-line benefits by improving our ELD compliance, driver performance and overall operational efficiency.”

About ORBCOMM Inc.
